Description:

Electric Power Systems, Inc is a unique company offering a wide range of experience and education in the area of power system operations, design, consultation and studies. We provide extensive services from planning studies, design and construction, to periodic testing and maintenance. We are currently seeking a skilled Electrical Engineer to join our Anchorage team.

Responsibilities:

This person will be responsible for the design and specifications for electrical generators, switchgear, substation layouts and equipment, substation protective relaying panels and switchgear. The position may also perform power system studies such as power flow, short-circuit, arc-flash and coordination studies. The position may also include distribution planning and long-range plan development. This position may also be responsible for field commissioning and construction inspection, quality control and implementation of designs. The person should have the ability to work in field conditions and perform troubleshooting and corrective action of conditions. The person should have the ability to define budgets and schedules and monitor the progress of projects according to a defined budget and schedule.

Benefits:

Electric Power Systems offers a great benefit package including Medical Insurance, Life Insurance, Long Term Disability, 401 (k) Plan, Health Club Membership, Employee Assistance Program, Paid Vacation and Paid Holidays.

Electric Power Systems, Inc. is an equal employment opportunity employer that values diversity at all levels. All individuals, regardless of personal characteristics, are encouraged to apply. We are an EEO/AA employer.
